*Product Owner
QA Engineer*

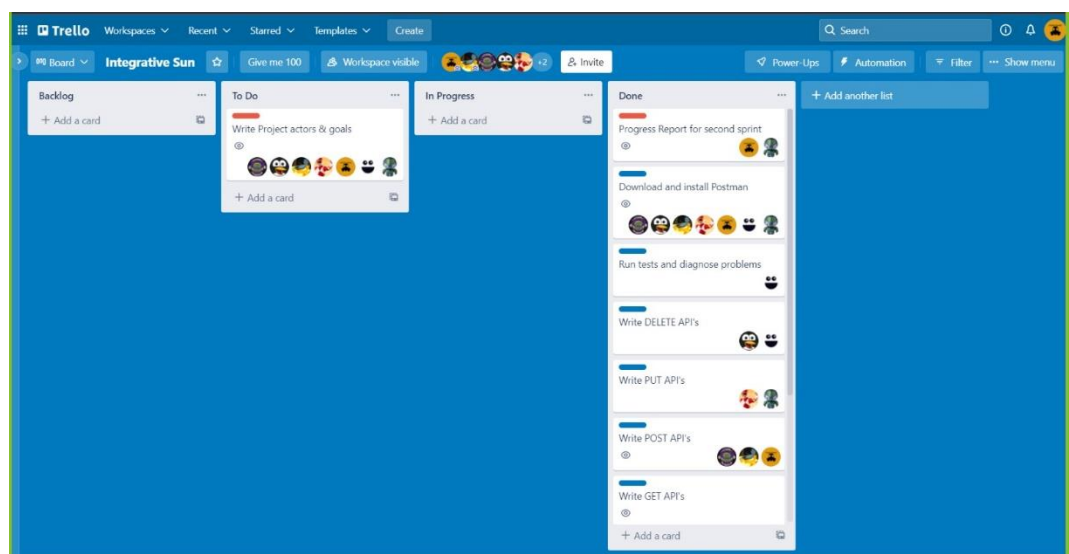

Ofir Goren
UI/UX

1. Kanban boards in this sprint:

Beginning of the sprint

End of sprint

2. General summary of work

2.1. What went well for the team and should be continued the on next phases of work

Working together in important phases but also teammates working alone because it's not necessary for all team members to be on chat together.

When we schedule a meeting, it never cancels.

2.2. What should be improved in teamwork

We should work together in coordination to avoid conflicts, mainly in code.

Maybe dividing the team into smaller groups for more effective work.

Team members should be more available.

2.3. What problems did the team encountered through this phase of work

GET methods didn't work.

Conflicts in merging code.

Anti-virus affecting the development environments.

2.4. Why did we not complete all planned work

We did.

2.5. What is expected for the next sprint

Preparing the work before pulling for coding.
