

Project Progress Report – Wishlist App

What type of Instances will you define in the project, what are their main purpose and attributes, how are they connected to each other:

Person – Contains personal information of system users that have signed in.

User – Contains site activity and purchase information and history of the application users.

Product – Contains purchase related information about the product i.e., Category.

Wishlist – Contains Products for user.

Person

```
{  
    First Name  
    Last Name  
    Age  
    Gender  
}
```

User extends Person

```
{  
    Username  
    urlHistory[]  
    Location  
    Preferred Categories  
    Date  
    Time  
    Wishlist[]  
}
```

Product

```
{  
    Name  
    Price  
    Brand  
    Category  
    Sub Category  
}
```

Wishlist

```
{  
    Product[]  
    Total Price  
    Maximum Budget  
    Description  
}
```

What type of Activities could be performed with these Instances

Add Product to Wishlist.

Search for Products.

Update personal details for User.

Publish / keep private Wishlist.

User can choose favorite categories and the system will suggest products accordingly.

Define a maximum budget for a Wishlist.

User can have multiple Wishlists.

List of Students detailing for each student:

Name	Id	Role	Avatar
Dmitry Gribovsky	317088573	DBA	
Asaf Chen	308024280	SCRUM Master	
Zohar Zaborski	204124382	Tech Writer	
Vladislav Khagay	319654497	Product Owner	
Ofir Goren	311125272	UI/UX	
Alon Ronder	208272278	DevOp	
Timor Bystritskie	311276315	Team Leader	

General summary of work

What went well for the team and should be continued the on next phases of work

Using Doodle provided us a more efficient way to schedule a meeting.

The team managed to quickly meet up.

Open minded for new ideas and making meaningful conversations.

What should be improved in teamwork

Teammates should open web cameras for more interaction.

More comments on the WhatsApp group.

What problems did the team encountered through this phase of work

Everyone has a very busy schedule, it's hard to find the perfect time.

It was hard to understand the idea of the project.

Moodle instructions were unclear.

Why did we not complete all planned work

We did complete all planned work.

What is expected for the next phase of work

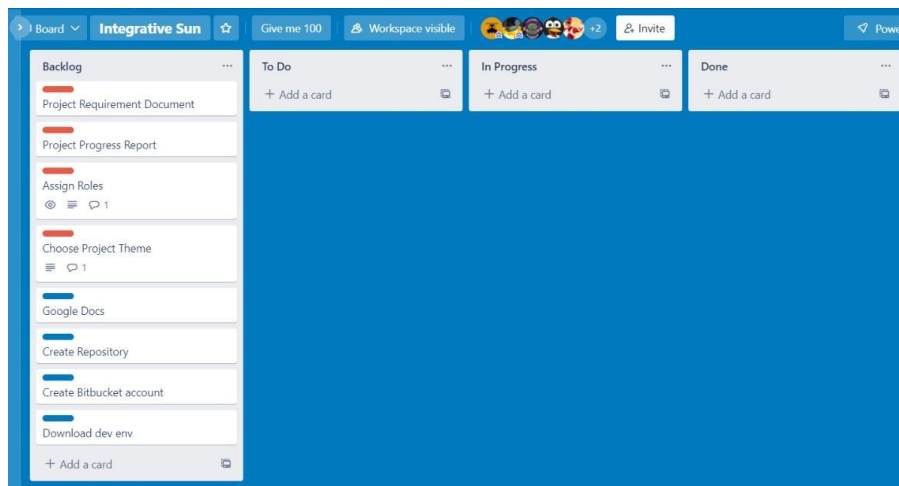

Finish defining the project instances.

Defining the essence of the project.

Start the main project reequipments document.
